### **DETAILED ACTION**

This application is a 371 of PCT/US99/31176 published as WO 00/39310 on July 6, 2000.

The preliminary amendment filed June 27, 2001 amending the specification to correct clerical errors, canceling claims 1-44 and adding claim 45-114 has been entered.

Claims 45-114 are pending.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 45-103 and 112-114, drawn to polynucleotide encoding rubredoxin fusion protein, a vector and host cell comprising the same and a method of making rubredoxin fusion protein and a rubredoxin fusion protein with amyloid peptide .

Group II, claim(s) 104-107, drawn to <sup>35</sup>S-labeled  $\beta$ -amyloid peptide.

Group III, claim(s) 108-111, drawn a method of making antibodies against rubredoxin fusion protein.

Art Unit: 1652

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the products of Group I and II lack special technical features because they are drawn to a rubredoxin fusion protein with various peptides and to a non-fused peptide, amyloid peptide, that can be fused to proteins other than rubredoxin. Furthermore,  $\beta$ -amyloid peptide is known in the art and therefore as a whole does not make a contribution over the prior art.

Group I comprises methods of use of various polynucleotides encoding fusion proteins. Group III is drawn to a method of use of another product, a fusion protein.

37 CFR 1.475 does not provide for multiple products or methods within a single application and therefore unity of invention is lacking with regard to Groups I-III.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
